What medical conditions does this child have that we should know about?

Does the child have allergies? Yes No Allergic to:

Have you located the source of exposure? Yes No Unk Have they been treated? Yes No Unk

Additional Comments:

How did you hear about us:
_____?

*Our Hand Holding Policy

"We are in this together until the end!" What that means for you, not only do we see you for your initial treatment, we build in 2 follow-up appointments to ensure all evidence of lice has been eradicated. (If your child has a sever case, and you wish to add additional head checks in addition to the two checks included in your initial payment, the cost is an additional \$10.00/head check regardless of hair length.) The follow-ups will occur within 2-3 days for sever infestations or 5-7 days for more mild infestations. Your technician will advise you of your next appointment after your treatment has been completed.

We can not continue to honor our hand holding policy if you do not schedule your first follow-up appointments within the following 7-10 days after an initial treatment has been completed and 10-20 days for the second follow-up. After that point are not able to monitor what has happening in your environment, is this a re-

infestation or something that was missed? It is a very important part of the process to make sure you continue to stay lice free. Any cases of re-infestation after our initial lice removal process has been successfully completed will be subject to standard treatment rates.

I understand that there may be a fee for services received and agree that I am responsible for said fee. Nitpickers has my authorization to take a head shot, to be used internally at NitPickerz ONLY for training purposes.
